紀念碑谷2 - Monument Valley 2

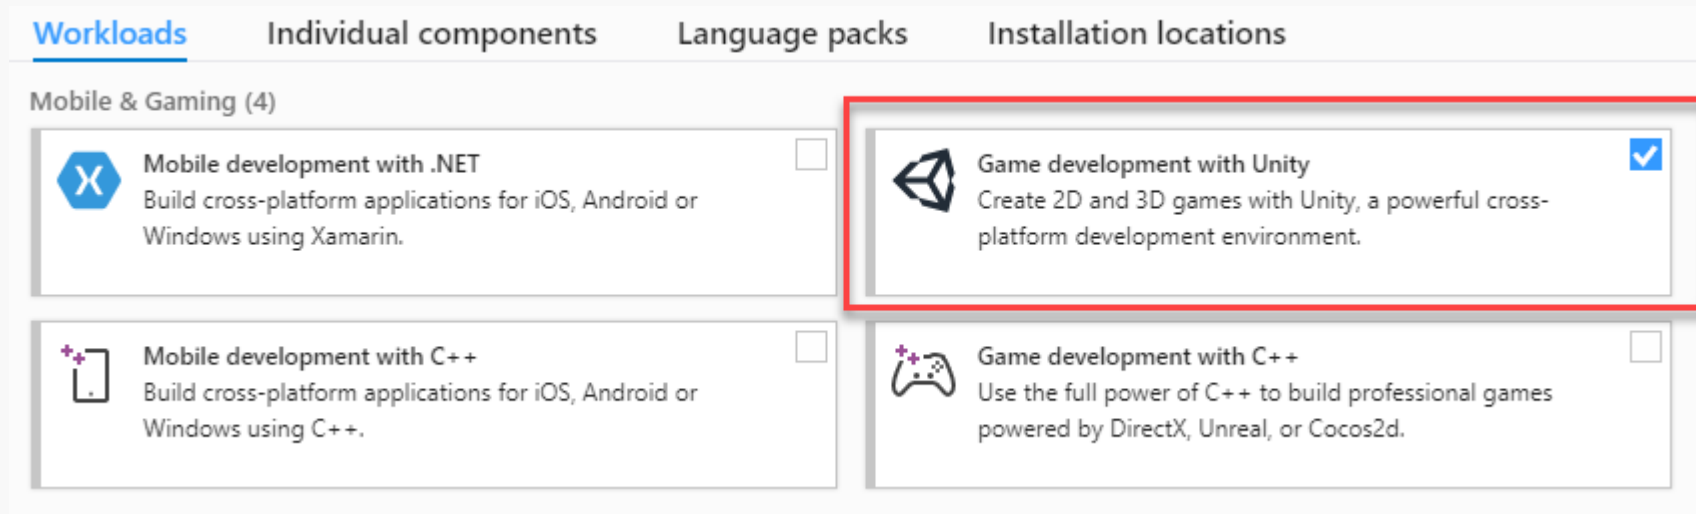

爐石戰記 - Heartstone

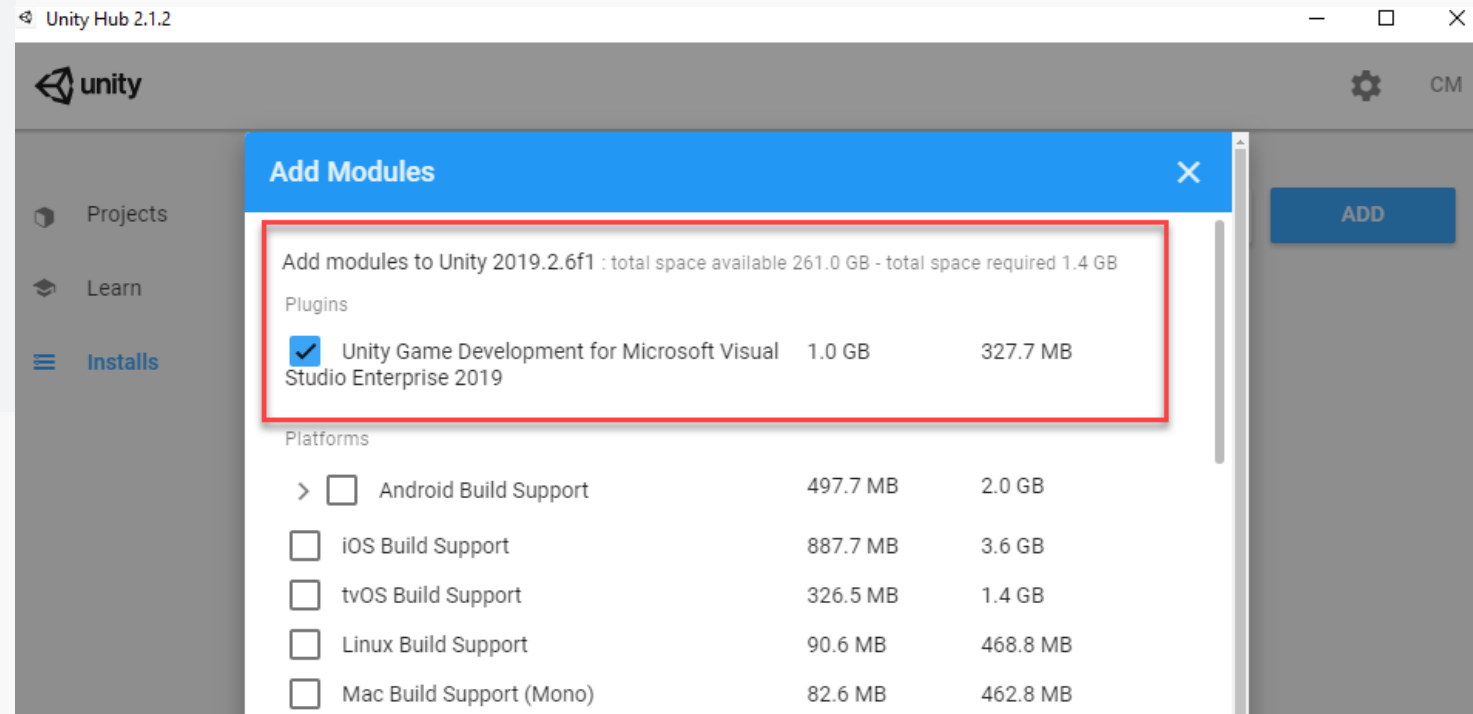

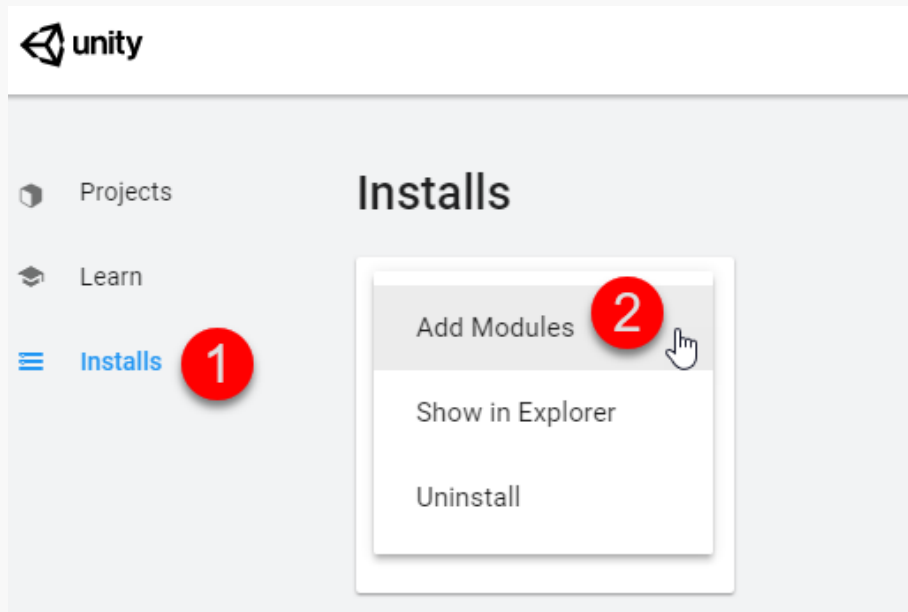

For Visual Studio users

Install the .NET Game Development workload

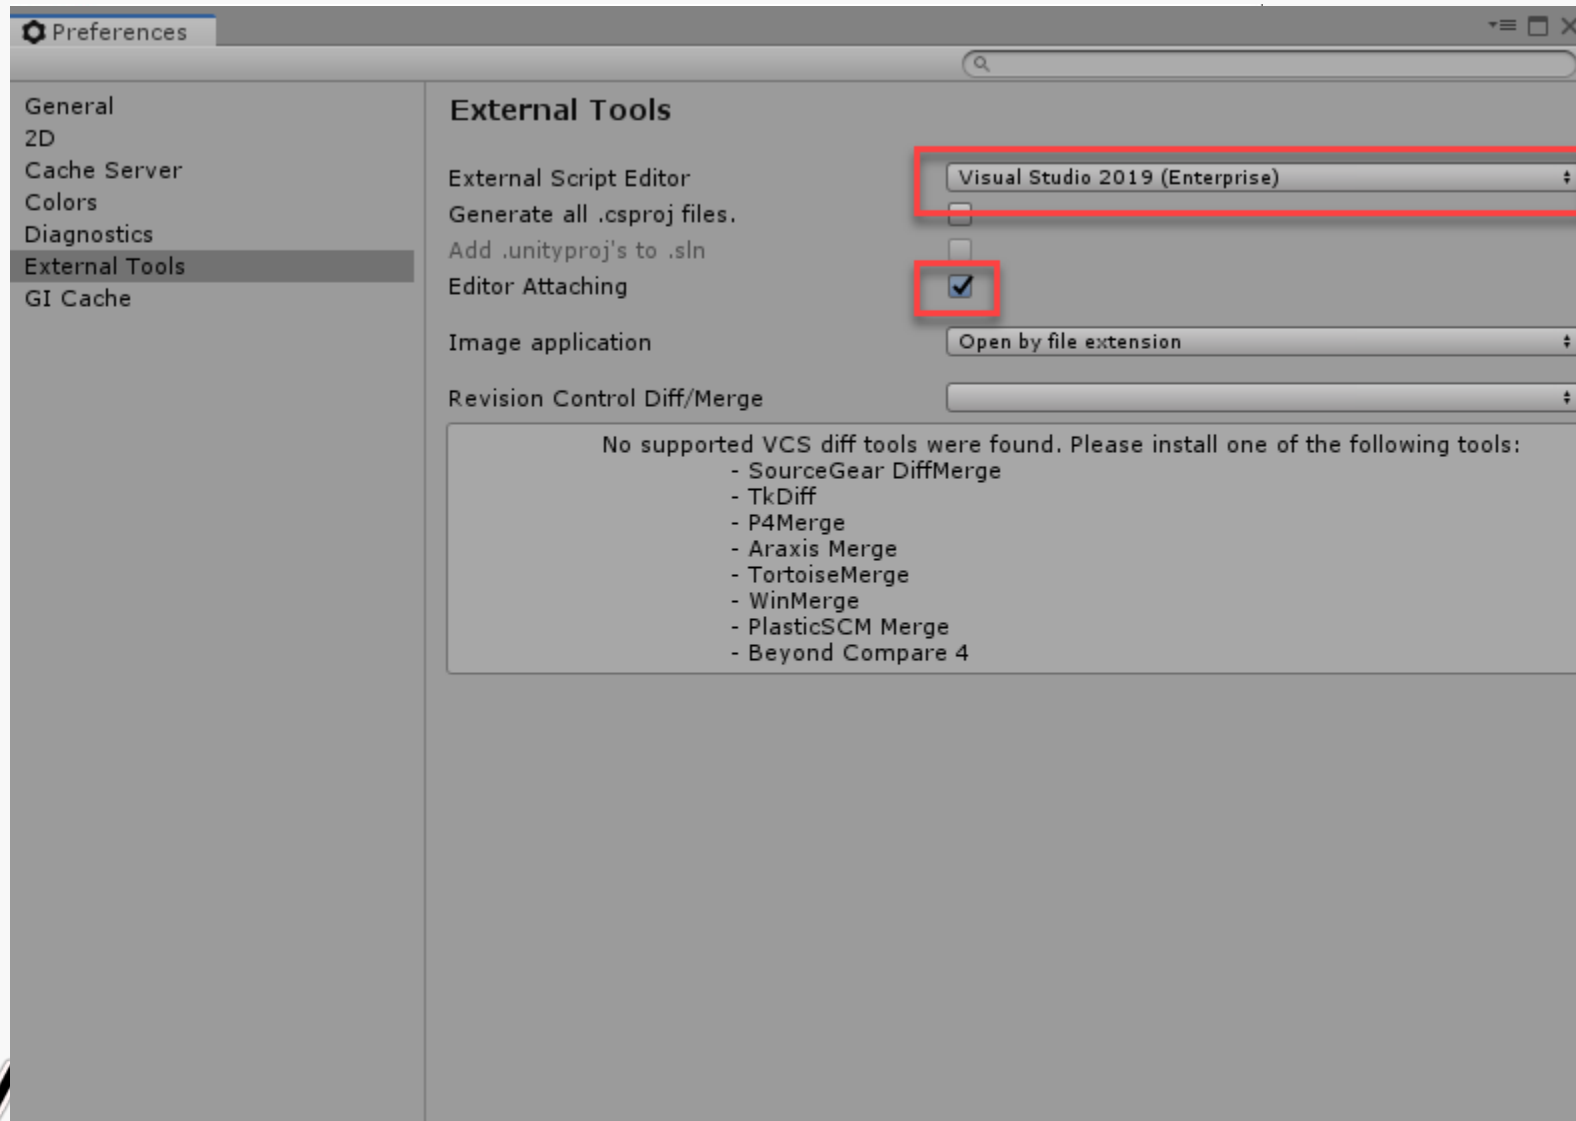

For Unity users

Installation via the Unity Hub

Everything's set correctly – game on

Why Visual Studio or Visual Studio for Mac for game dev?

Visual Studio ♥ Unity

Fully featured IDE

- Refactoring (Ctrl | Cmd + .)
- Go to Definition (Ctrl | Cmd + click or F12)
- Navigate to decompiled assemblies
- Suggested variable names
- Duplicate Line (Ctrl | Cmd E+ V)
- Multi-cursor mode (Ctrl + Alt | Cmd + Option + click)
- Global search (Ctrl + T)
- Go to Enclosing Block
- Visual Studio Mac key bindings to Visual Studio on Windows 💡

Visual Studio ♥ Unity

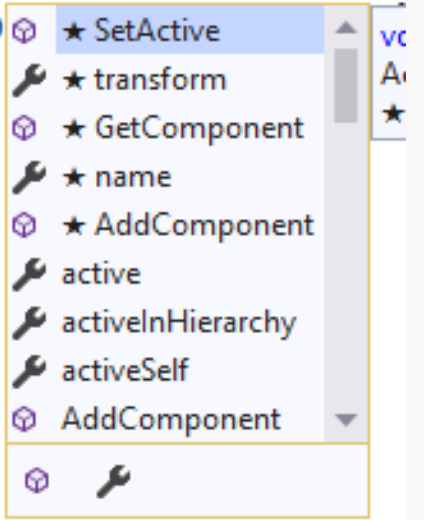

Fully featured IDE

- IntelliCode
- Visual Studio Live Share
- Built-in source control
- Real-time code analysis
- .editorConfig
- CodeLens
- Synchronize settings between devices
- Custom screen layouts
- Light and Dark themes

Unity and Visual Studio =

- IntelliCode support for Unity API Messages
- Superior Debugging
- Unity Project Explorer
- Attach and Play
- Quickly browse Unity documentation

```
var particleSystem = gameObject.GetComponent<ParticleSystem>();  
if (particleSystem != null && !particleSystem.isPlaying) {  
    particleSystem.Play();  
    Destroy(gameObject, 1.5f);  
}
```

Visual Studio 16.3 + Visual Studio for Mac 8.3

- Create C#, Shader, and Enum files directly in the Unity Project Explorer
- Faster project reloading
- Reduced attach time for debugging
- Support for more unsafe code debugging options
- Unity-specific analyzers and diagnostics
- Suppress non-applicable C# diagnostics
